PROJECTS

Job Portal Application | LINK

- Secure user authentication, allowing both Job Seekers and Recruiter to create and manage their profiles.
- Recruiter can post job openings, including detailed descriptions, requirements, and location.
- Job seekers can easily search for jobs using various filters such as location, job type, and Domain.
- Job seekers can track the status of their Application.

Crop Recommendation System | LINK

- Optimize Crop Selection : Assist users in selecting the best crops for their specific environmental and soil conditions to maximize yield and sustainability.
- Target User : Individuals looking for data-driven advice on which crops to plant based on their unique farm conditions.
- System suggests suitable crops by analyzing user-provided data on soil, climate, and other factors.

Crypto Market Application | LINK

- Fetch Real Time Cryptocurrency Data: Retrieves up-to-date information on various cryptocurrencies, including Prices and Market cap.
- User-Friendly Interface: Provides a seamless experience across different devices with a responsive design.
- Dynamic Data Rendering: Efficiently manages and displays cryptocurrency data.
- Visual Representation of Market Trends: Incorporates charts to visually illustrate market trends.
